

Comandos

Información de estado del *ksqldb-server*

```
docker exec -it ksqldb-server curl http://localhost:8088/info | jq
docker exec -it ksqldb-server curl http://localhost:8088/healthcheck | jq
docker exec -it ksqldb-server curl http://localhost:8083/ | jq
```

Listado de plugins instalados

```
docker exec -it ksqldb-server curl http://localhost:8083/connector-plugins | jq
```

Secuencia típica de conexión

```
docker exec -it ksqldb-cli ksql http://ksqldb-server:8088
list topics;
SET 'auto.offset.reset'='earliest';
```

Scripts ksql

```
#!/bin/bash

# raw_songs
docker compose exec ksqldb-cli bash -c "ksql http://ksqldb-server:8088 <<EOF
RUN SCRIPT '/lo_que_sea/raw_songs.ksql';
exit ;
EOF
"
```
